

# General Purpose Molar Bands

DENOVO General Purpose Molar Bands are made in regular temper and narrow occlusal-gingival height. These bands, designed with maxillary and mandibular shapes, have universal anatomy to fit 1st primary, 2nd primary and 1st permanent molars. Each band is fully proportioned to provide a gradual increase in height as band size increases.

## Individual Molar Bands

# Stainless Steel Crowns

DENOVO's Stainless Steel Crowns are pre-trimmed for proper tooth coverage; anatomical gingival contour saves chair time when fitting crown.

Parallel crown walls saves chair time, minimizing the need for buccal, lingual, and mesial tooth reduction.
